The Floriculture Sustainability Initiative was initiated in 2012 by 25 stakeholders in the floriculture sector, the founding members of FSI. They share the goal of finding more sustainable solutions for farmers, for the environment, and for the future of the sector, and set themselves the ambition to have 90% flowers and plants responsibly produced and traded by 2020.

In 2013, FSI was established as an independent international non-profit association under Belgian law (aisbl), supported primarily by its members and through project funding.

From the start, IDH the Sustainable Trade Initiative was the convenor and one of the major donors to enable the start-up process of FSI. Today, FSI is still actively collaborating with IDH taking part in the IDH Fresh & Ingredients program.
